

MSC-3—MANASQUAN INLET, NJ TO CAPE HATTERAS, NC

U.S. DEPARTMENT OF COMMERCE  
National Oceanic and Atmospheric Administration  
National Weather Service  
**MARINE WEATHER SERVICE CHART**  
MANASQUAN INLET, NJ TO CAPE HATTERAS, NC  
NOT TO BE USED FOR NAVIGATION

NATIONAL WEATHER SERVICE TELEPHONE NUMBERS

Marine weather forecasts and also Small Craft Advisories, Gale, Storm, and Hurricane warnings, when issued can be obtained by telephone as follows:

NWS OFFICE	TELEPHONE	OFFICE HOURS/LOCAL TIME
Mt. Holly, NJ	609-261-6600	24 hours
Baltimore, MD/		
Washington, DC	703-260-0506	24 hours
Wakefield, VA	757-899-4200	24 hours
Morehead City, NC	252-223-5737	24 hours

Recorded forecast contains the latest Marine Forecast and Warnings issued.

COASTAL MARINE FORECAST AREAS

Coastal marine forecasts are issued for the following areas:

Coastal waters from Manasquan Inlet, NJ to Little Egg Inlet, NJ  
Coastal waters from Little Egg Inlet, NJ to Great Egg Inlet, NJ  
Coastal waters from Great Egg Inlet, NJ to Cape May, NJ  
Coastal waters from Cape May, NJ to Cape Henlopen, DE  
Coastal waters from Cape Henlopen, DE to Fenwick Island, DE  
Delaware Bay waters north of East Point Breakwater Harbor, NJ to Slaughter Beach, DE  
Delaware Bay waters south of East Point Breakwater Harbor, NJ to Slaughter Beach, DE  
Chesapeake Bay north of Pooles Island, MD  
Chesapeake Bay from Pooles Island, MD to Sandy Point, MD  
Chesapeake Bay from Sandy Point, MD to North Beach, MD  
Chesapeake Bay from North Beach, MD to Drum Point, MD  
Chesapeake Bay from Drum Point, MD to Smith Point, VA  
Tidal Potomac from Key Bridge to Indian Head, MD  
Tidal Potomac from Indian Head, MD to Cobb Island, MD  
Tidal Potomac from Cobb Island, MD to Smith Point, VA  
Chesapeake Bay from Smith Point, VA to Windmill Point, VA  
Chesapeake Bay from Windmill Point, VA to New Point Comfort, VA  
Chesapeake Bay from New Point Comfort, VA to Cape Henry, VA  
Coastal waters from Fenwick Island, DE to Chincoteague, VA  
Coastal waters from Chincoteague, VA to Parramore Island, VA  
Coastal waters from Parramore Island, VA to Cape Charles Light, VA  
Coastal waters from Cape Charles Light, VA to VA-NC border  
Coastal waters from VA-NC border to Currituck Beach Light, NC  
Coastal waters from Currituck Beach Light, NC to Oregon Inlet, NC  
Coastal waters from Oregon Inlet, NC to Cape Hatteras, NC  
Coastal waters from Cape Hatteras, NC to Ocracoke Inlet, NC

WAVE FORECASTS APPEARING IN COASTAL MARINE FORECASTS:

Wave height forecasts are for average wave conditions to be encountered in open coastal waters except if otherwise indicated. Values are for waves produced by wind and do not take into account areas of normally higher or steeper waves found near bars, shoals or restricted entrances into sounds or inlets. Occasionally, waves can combine and peak out at twice the forecast value. Where possible, swell waves will be separately described.

NOAA WEATHER RADIO

NOAA Weather Radio broadcasts on 162.400, 162.425, 162.450, 162.475, 162.500, 162.525, and 162.550 can usually be received 20-40 miles from the transmitting antenna site, depending on terrain and the quality of the receiver used. Where transmitting antennas are on high ground, the range is somewhat greater, reaching 60 miles or more. The VHF-FM frequencies used for these broadcasts require narrow band FM receivers. The National Weather Service recommends receivers having a sensitivity of one microvolt or less and a quieting factor of 20 decibels. Some receivers are equipped with a warning alert device that can be turned on by means of a tone signal controlled by the National Weather Service office. This signal is transmitted for 13 seconds preceding an announcement of a severe weather warning.

MARINE WEATHER REPORTING PROGRAM

The National Weather Service (NWS) has established a Nationwide Mariner Report Program — MAREP — to help improve marine warnings and forecasts. Through this cooperative effort, professional mariners make radio reports of sea and wind conditions to NWS marine forecasters. If you would like to participate or learn more about this volunteer program, please call:

NWS Washington, DC 703-260-0107

EXPLANATION OF ADVISORIES/WARNINGS

**SMALL CRAFT ADVISORY:** Issued to alert mariners to sustained (more than two hours) weather or sea conditions, either present or forecast, that might be hazardous to small boats. Boaters/mariners will be able to receive the Small Craft Advisory by keeping tuned to a NOAA Weather Radio Station or the Coast Guard and commercial radio stations that transmit marine weather information. The threshold conditions for the Small Craft Advisory are usually based on 25 knots of wind or hazardous wave conditions. Decision as to the degree of hazard will be left to the boat operator, based on experience and the size and type of boat. There is no legal definition of the term "small craft".

**GALE WARNING:** Issued to indicate winds within the range of 34 to 47 knots are either present or forecast for the area.

**STORM WARNING:** Issued to indicate winds of 48 knots or above, no matter how high the speed, are either present or forecast for the area.

**SPECIAL MARINE WARNING:** Issued whenever a severe local storm, or strong wind of brief duration is imminent and is not covered by existing warnings or advisories.

**TROPICAL STORM WARNING:** Issued to indicate winds within the range of 34 to 63 knots are either present or forecast in conjunction with a tropical cyclone.

**HURRICANE WARNING:** Issued to indicate winds 64 knots or more are either present or forecast for the area in conjunction with a tropical cyclone.

**NOTE:** A "TROPICAL STORM WATCH" or "HURRICANE WATCH" is issued whenever a tropical storm or hurricane becomes a threat to a coastal area. The "WATCH" is not a warning, but indicates that the tropical cyclone is near enough that persons in the area covered by the "WATCH" should listen to their radios for subsequent advisories and be ready to take precautionary action in case tropical storm or hurricane warnings are issued.
